

The Federal Communications Commission

Dear The Federal Communications Commission,

My last cell phone bill had 6% state tax, 3% federal tax, and then 12% in additional misc taxes, on my \$70 bill there was \$20 (yes TWENTY DOLLARS) in tax's. This is higher than my income tax rate. these hidden taxes have to stop. If the phone providers can not fund their infrastructure (and PAC monies) from operations, then they need to raise rates and let the fair market rule. STOP this mentality.

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

jeff Leitson
